

AUXILIARY MATERIALS: ZEMENTOL SKA kicker construction aid

Description:

- The way the ZEMENTOL SKA is designed helps to ensure the fast and efficient construction of kickers when waterproofing the joint between the slab and the walls.
- There is no cost-intensive de-shuttering and disposal of the kicker shutters.
- ZEMENTOL SKA is a robust component made out of expanded metal fences mounted on u-shaped, separately welded brackets.
- ZEMENTOL SKA is used as permanent shuttering. It is not offset when calculating the structural reinforcement requirements.

Material and components:

- Expanded metal fences and steel brackets.

Size:

product type	length (in mm)	width (in mm)	height (in mm)
ZEMENTOL SKA	2,400	110	120

Delivery unit:

- Single ZEMENTOL SKA.

Installation:

- ZEMENTOL SKA is placed in the centre of the connector reinforcements in the walls. It is placed on the top layer of the reinforcements and fixed with wires.
- ZEMENTOL SKA is filled with concrete during the placement and compacted by hand.
- ZEMENTOL SKA remains as permanent shuttering in the concrete.
